

AVERO Premium

The perfect bathing
and nursing solution

AVERO Premium

COMBINES ERGONOMICS AND MODERN DESIGN

ComfortMedic designs and manufactures high quality products for long term care facilities which enable your patients to have an enjoyable and relaxing bathing experience while your nursing staff benefit from ideal working conditions.

DEVELOPED WITH NURSING STAFF

The AVERO Premium bath has been sympathetically developed with the needs of nursing staff and occupational therapists in mind. The ergonomically designed interior with the lowered leg space and use of premium materials all provide a relaxing bath to the highest degree. This modern and elegant bath is reliable, safe and easy to operate and gives reassurance of a comfortable experience for the resident and patients as well as the nursing staff.

ACCESSIBLE FROM 3 SIDES AND UNDERNEATH

The AVERO Premium bath is easily accessible from 3 sides as well as underneath, meaning that even in small rooms and narrow spaces bath lifts and hoists can be used. The Avero Premium bath does not need to be fixed to the floor and still maintains stability and can be adjusted accordingly to accommodate various floor and room conditions. This bath combines new design with high functionality and will compliment any nursing bathroom beautifully.

Lowered foot area

AVERO PREMIUM

FOR A RELAXED AND ERGONOMICAL BATH

The modern AVERO Premium height adjustable bath gives a comfortable and ergonomical bathing experience, with or without a hoist due to its lowered foot area and specially shaped back area.

LOWERED FOOT AREA AND HYGIENIC OPENING

The internal bath tub and unique lowered foot area enable the use of all modern nursing lifts and hoists on the market. The foot area and special bath shape with distinctive arm rests also give a balanced interior feel allowing the resident to relax and stretch out. This is also an advantage when using a seat lift and offers additional support for the resident inside the bath. The seating area is also equipped with a hygienic opening section, which provides easy access for intimate cleaning.

SAFETY AND COMFORT

Operation of the bath is simple due to the use of universally recognisable icons. High quality thermostatic mixer, with temperature and pressure balanced system and with anti-scalding protection, is used to protect the resident and provide safety for the nursing staff during daily care. Premium chrome grab handles which are embedded into the tub rim along with slots for the tub shortener, give the Avero Premium a distinctive look as well as providing supreme support for the resident.

AUTOMATIC WATER FILLING STOP

The included automatic water filling stop enables you to select and set the water level meaning that you can attend to the resident when filling the bath in the comfort of knowing that the bath will not overflow. Once the water reaches the preset height, the flow can be re-started and stopped again by simply pushing a button. This saves time and energy costs and allows the full attention on the resident during bath preparation.

The seating area with hygienic opening section provides easy access for intimate cleaning.

Ergonomical interior with arm rests and grab handles for added comfort and safety.

Options

AVERO PREMIUM

AIR SPA SYSTEM

An integrated air spa system offers your resident a relaxing and bath due to the massaging effect. In addition, there is no risk of cross contamination from the jets with our unique design preventing water from entering the system.

COLORED LIGHT THERAPY SYSTEM

Four LED lights built into the side of the bath give a relaxing and therapeutic bathing experience with the option of manually selecting any colour or by an automatic light program.

MUSIC SOUND SYSTEM

Two premium integrated speakers in the tub transform the music into water vibrations which create a unique state of the art sound experience for the resident. Music is played using a USB connection which means that each resident can have its own chosen music played and changed on a regular basis. A water resistant hand held remote control enables easy operation of the music system.

The air spa system stimulates the senses with a massaging effect on the skin which enhance relaxation.

AROMATHERAPY SYSTEM

An integrated aromatherapy system, which when used in conjunction with the warm air spa, releases your chosen scent which can help to stimulate the senses. This is easy to operate and is completely maintenance free. (The Aromatherapy system can only be used in conjunction with the air spa system).

DISINFECTION

An integrated disinfection system gives maximum protection against cross contamination and can be used with most disinfection fluids. The disinfection hand shower and storage box are secured behind the control area, out of reach of the resident. ComfortMedic also offer a full range of cleaning products and disinfectant products.

The integrated, maintenance-free aromatherapy system allows use of various scents when used in conjunction with the air spa system.

Key benefits
